

Micro vs Macro Benchmarks?

MicroBenchmarks:

- Measure a single component or task

Lowlevel

• **Instructions, cautions, misuses etc.**

• Akin to unit tests

MacroBenchmarks:

• Measure a whole system

• Higher level

• **Throughput, execution time**

• Akin to integration tests

- Reflect what your users will see

Micro vs Macro Benchmarks?

- **Micro Benchmarks:**

- Measure a single component or task
- Low level
 - Instructions, cache misses etc.
- Akin to unit tests

- **Macro Benchmarks:**

- Measure a whole system
- Higher level
 - Throughput, execution time
- Akin to integration tests
- Reflect what your users will see
