

Problems

```
void setGlobalString (std::string*);

void entry_point (std::shared_ptr<synchronized_value<std::string>> sync_s, int tid)
{
    apply ([tid] (auto& s) {
        setGlobalString (&s);
        //...
        return s;
    },
    *sync_s);
}

int main()
{
    //...
    auto s = std::make_shared<synchronized_value<std::string>> ("Hello threads");
    //...
}
```

Problems

```
threads.push_back (safe_thread (entry_point, auto (s), auto (i)));
```
